

EZY-PAK® #120

GENERAL PURPOSE VALVE PACKING

DESCRIPTION

EZY-PAK #120 is a general-purpose packing compound designed specifically for hydrocarbon and aqueous use. It is an injectable packing that can be pumped into cavities using a high pressure grease-gun. Under pressure, **EZY-PAK#120** forms a gasket or seal conforming to the shape of any void. **EZY-PAK#120** is formulated from hydrocarbon resistant vegetable oils, polymers, fillers and fibres blended into a dough-like compound. It is best applied via a 3mm or larger nipple but can be used, with more effort, on buttonhead connectors. **EZY-PAK#120** is ideal for preventing leaks while lowering the torque required to operate the valve.

ADVANTAGES

- Non toxic
- Colour: Grey/Black
- Water Resistant
- Seals
- Asbestos Free
- Non hazardous
- Veg oil base
- Pumpable
- Lubricates
- Corrosion Resistant

APPLICATIONS

EZY-PAK #120 is an injectable packing that can be pumped into the stem gland of expanding gate valves through ball check fittings on the body or bonnet. **EZY-PAK #120** can also be shaped by hand and pressed into any area requiring leak-free seal or packing.
