

# JET-LUBE® UNICID CATALYST

WATER WELL TREATING ADDITIVE

## DESCRIPTION

JET-LUBE UNICID CATALYST is a liquid organic, slightly acidic formulation with polymer dispersants. JET-LUBE UNICID CATALYST effectively dissolves blockage in wells, systems, and water tanks due to mineral scale, slime forming bacteria and the oxides created by the decaying bacteria. JET-LUBE UNICID CATALYST also suspends the debris to be pumped from the well or system, as well as protects metal surfaces from corrosion.

## APPLICATIONS

JET-LUBE UNICID CATALYST can be used to remove the mineral scale build-up that causes plugging and a reduction of the yield in a well.

## DIRECTIONS FOR USE

For use in systems or pipelines: Calculate the total amount of water in a system or pipeline to be treated plus whatever amount of water in recirculation piping may be required. Multiply total gallons of water times 5% (0.05) for the amount of Jet-Lube Unacid Catalyst. Mix the granular into water followed by Jet-Lube Unacid Catalyst. Pump into system. Recirculate liquid. Monitor pH every 3-5 hours. When pH rises above 3.5, add 30% of initial dosage of just Jet-Lube Unacid Granular product. Repeat as necessary. When pH does not rise, it is complete.

## PACKAGING

<u>Code No.</u>	<u>Container Size</u>	<u>Container Type</u>
DWT300	1 gallon	jar
DWT303	5 gallon	jug
DWT306	55 gallon	drum

## LIMITED WARRANTY

Jet-Lube, Inc. makes the Limited Express Warranty that at the date of delivery this product shall be free from defects in Jet-Lube, Inc. materials and workmanship. This Limited Express Warranty is expressly in lieu of any other express or implied warranties, including any implied warranty of merchantability or fitness for a particular purpose, and of any other obligation on the part of Jet-Lube, Inc. The sole remedy for breach of the Limited Express Warranty shall be the refund of the purchase price. All other liability is negated and disclaimed, and Jet-Lube, Inc. shall not be liable for incidental or consequential damages.
